Until further notice: ALL crew members and patient MUST wear (at minimum) surgical masks throughout duration of call

- EMS Personnel must screen all potential patients for exposures, risk factors, travel history, and symptoms
- DO NOT rely solely on dispatchers to screen patients for biohazard exposure or infectious disease risk factors
- A single provider (when appropriate) should make initial patient contact, triage and determine what level of PPE should be worn

COVID-19 Checklist

Monitor For

- Fever of 100.4 or higher – make sure to take multiple times
- Persistent dry Cough – A dry cough is one that produces no phlegm or spit
- Difficulty Breathing not relieved by rest

Call 911 If

- Rapid breathing, more than one breath every 3 seconds
- Persistent pain or pressure in the chest
- New confusion or inability to arouse
- Bluish lips or face
- Increased weakness
- Indistinct feeling of getting worse
